PROFILE

Abdurahmon Mamadiyrov *Frontend Developer | JavaScript | React*
I am a Software Engineer from Jizzax, Uzbekistan, with 1+ years of experience in frontend development. My expertise lies in JavaScript, TypeScript, React, and Node.js, where I have designed and built scalable, maintainable applications for production. Beyond writing code, I excel at architecting efficient solutions, optimizing system performance, and leading development efforts to deliver high-quality software. I have a track record of successfully managing complex projects, collaborating with cross-functional teams, and mentoring junior developers. Currently, I am expanding my expertise in Go and backend architecture, focusing on high-performance data management and distributed systems.

SKILLS

HTML5, CSS3, Tailwind CSS, React.js, Next.js, React Native, MUI, Ant Design (Antd), Chakra UI, Shadcn UI, Node.js, Express.js, REST API, OAuth, JWT, NextAuth.js, Redux, Zustand, React Query, Lynx.js, JavaScript, TypeScript, CI/CD, GitHub Actions, Core Web Vitals

WORK EXPERIENCE

Frontend Developer <i>CodeVision</i>	03/2025 – present Jizzax, Uzbekistan
Joined CodeVision.uz to contribute to large-scale projects, collaborating in an office environment to develop high-performance frontend solutions. Key responsibilities include: - Building and optimizing user interfaces for scalability and responsiveness. - Working closely with cross-functional teams to ensure seamless integration of frontend components. - Implementing modern frontend technologies to enhance performance and maintainability. This role has strengthened my ability to work on complex projects, refine best coding practices, and contribute to a collaborative development culture.	
Frontend Developer <i>Bi Soft Tech</i>	12/2024 – 03/2025 Tashkent, Uzbekistan
At Bisoft, I collaborate with a skilled team to develop large-scale, high-impact projects in a hybrid environment, combining in-person and remote collaboration for maximum efficiency. My role focuses on: - Developing scalable, user-centric interfaces that enhance user experience and performance. - Engineering complex frontend architectures, ensuring maintainability and seamless functionality. - Optimizing workflows and fostering team collaboration, contributing to a dynamic and agile development process. By leveraging modern frontend technologies, I help drive innovation, performance, and product success.	
Computer Literacy Mentor <i>Learn Up Educational Centre</i>	08/2024 – 11/2024 Jizzax, Uzbekistan
Mentored students in Linux, Frontend Development, and Computer Literacy, providing structured guidance to simplify complex concepts and accelerate their learning curve. Designed and delivered hands-on training sessions, ensuring students develop practical skills in real-world development environments. Focused on bridging knowledge gaps and making programming more accessible by sharing best practices and industry insights.	
Project Manager <i>Hadia Market</i>	07/2024 – 08/2024 Jizzakh, Uzbekistan
Led the development of Hadia.uz, managing both frontend engineering and project coordination while mentoring a team of junior developers. Despite financial constraints, successfully balanced development, project management, and studies, ensuring the platform's growth and stability. Key contributions include: - Architecting and developing the frontend, delivering a seamless user experience. - Guiding junior developers, fostering technical growth and efficient teamwork. - Overseeing project execution, aligning business goals with technical implementation. This role strengthened my leadership, problem-solving, and adaptability in high-pressure environments.
